10 UNBEATABLE ARGUMENTS FOR FARE® QUALITY UMBRELLAS:

DESERVEDLY CONVINCING

FARE® products have received numerous **international awards** for their trend-setting design and outstanding functionality.

1. EFFECTIVE

Your imprinted brand is shown every time the umbrella is used – by the users themselves and therefore unbeatably credible.

2. ALWAYS AT HAND

Always there thanks to real added value – with a lasting positive effect on the user.

3. VERSATILE

Whether as a gift, merchandising item or for sales promotion.

4. FLEXIBLE

With plenty of scope for creative ideas and individual design – classic or playful, discreet or eye-catching.

5. LONG-LASTING

Thanks to high-quality materials, the advertising effect lasts for many years.

6. EYE-CATCHING

Hardly any other promotional item offers so much space to showcase your brand.

7. TARGETED

Recipients of umbrellas usually use them themselves – the wastage is very low.

8. EMOTIONAL

Umbrellas are a tactile form of advertising that appeals to all the senses and thus promotes emotional loyalty.

9. AWARD-WINNING

Many FARE® models have won prizes for design, sustainability or originality.

10. AFFORDABLE

Achieve great advertising impact even with a small budget.

RESPONSIBILITY FOR PEOPLE AND THE ENVIRONMENT

waterSAVE

EVERY DROP COUNTS

INFO

WATER-SAVING COLOURED COVER MATERIAL MADE FROM RECYCLED PLASTICS

Thinking progressively is good – but it's progressive action that makes the difference. As part of our sustainability strategy, we introduced the **revolutionary waterSAVE® dyeing process** in 2020: The yarn, which is made from recycled plastics, is dyed all the way through during the production process.

This has **advantages for the environment** compared to the conventional process, in which the yarn is first produced and then dyed in a further step:

» The **water saving per umbrella** is

approx. **6L***

approx. **90%** water saving

approx. **60%** reduction in emissions

approx. **70%** energy reduction

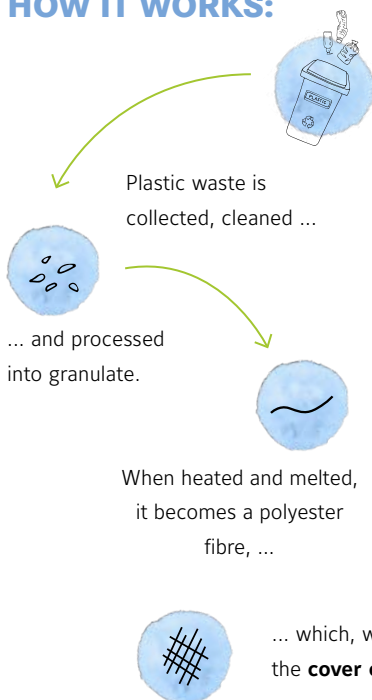

approx. **98%** less sewage sludge

NOW IT'S GETTING COLOURFUL!

While initially only black umbrellas could be fitted with this sustainable cover in 2021, **additional colours and many models** have been added since 2022. For example, our popular **ÖkoBrella family** has been converted to **waterSAVE®** cover material.

We also offer some models where the cover is optionally available with waterSAVE® material.

AND THIS IS HOW IT WORKS:

All **waterSAVE®** models are **labelled on the closing strap**, which only becomes visible when opened.

-  **wS** Natural white
-  **wS** Red
-  **wS** Lime
-  **wS** Navy
-  **wS** Grey
-  **wS** Black

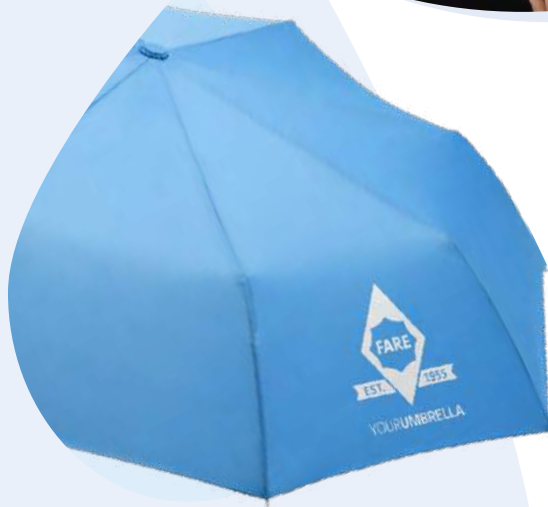

* Calculated based on water savings of 2 million litres of water for processing around 300,000 m² of fabric, from which around 350,000 umbrellas can be produced.

CREATE EXCITEMENT

INFO

Umbrellas offer a **wide variety of finishing options**. We explain the various options and areas of application for stock items.

SCREEN PRINTING

Up to **seven fresh colours** effectively set the scene for logos, slogans or witty sayings. The focus is on **top quality and long service life**.

TRANSFER PRINTING

Particularly suitable for **photorealistic motifs** and images with very fine screens or fine gradients - possible on **all coloured covers**.

SUBLIMATION PRINTING

Special printing process for **photorealistic motifs** on **white covers**.

WE'VE GOT IT HANDLED

John Smith

DOMING

3D effect in brilliant colours for a particularly sophisticated, photorealistic look.

WOOD/LASER STICKERS

Laser stickers made of wood or plastic are elegant and inexpensive – also ideal for **individual personalisation**.

LASER ENGRAVING

Discreet and elegant, razor-sharp contours and delicate depiction of the smallest details. Umbrellas with a laser-capable handle are labelled accordingly.

SOUND RECORDING

From audio logo to club anthem: Any sound can be played here and **sounds when the umbrella is opened**.
