PROTECTIVE CLOTHING AND REFLECTIVE ACCESSORIES FOR INCREASED VISIBILITY FOR MEDIUM RISK SITUATIONS EN 17353:2020

Type B1 Free hanging devices:

- Requires an optical active area of at least 15 cm² per side, with the total area not exceeding 50 cm² per side.
- Thickness should not exceed 10 mm.
- For 360° visibility, use two devices on the left and right side of the torso.

Type B2 Devices Equipment for limbs:

- Reflective area must be a minimum of 0.018 m² of two devices..
- Reflective material must encircle each limb with a minimum width of 20 mm.
- Should be worn in pairs to meet the requirements.

Type B3 Products:

- Minimum retroreflective area of 0.06 m² for height ≤140 cm and 0.08 m² for height >140 cm.
- Reflective material should encircle the torso or upper arms.

To sustain the highest level of quality management and legal compliance demands a strict self-monitoring system. We are therefore also by nature obliged to stay alert with any changes in all required legislations worldwide and keep all our ISO and EU Type-Examination Certificates as well as product registrations updated. We follow the PPE guidelines on application of Regulation (EU) 2016/425 of the European Parliament and of the Council for Personal Protective Equipment.

Compliance:

- Adhere to PPE guidelines under Regulation (EU) 2016/425.
- Updated reflective products and garments according to the new PPE regulation (EU) 2016/425.

Our Environmental & Quality Control Certificates:

- EN ISO 14001:2015 for Environmental Management System.
- ISO 9001:2015 for Design, Development, Production, and Distribution of Reflective Products.

Our Social Compliance Programs:

- Compliant with CSR programs audited/certified by Amfori (BSCI) and SEDEX.
- Audited/certified by BRC Global Standards.

REACH:

- Materials tested according to European Chemicals Agency directive EC/1907/2006.

Notifying Bodies / Certification Bodies:

- EN 17353:2020 and EN ISO 20471:2013+A1:2016 certificates are issued by TÜV Rheinland and SGS.
- Our ISO 9001 and 14001 certificates issued by TÜV SÜD.

FULL REFLECTIVE HARNESS

 Stock in EU

Model: RFX-FR05

Product identification: These garments bear CE marking to demonstrate compliance with Regulation (EU) 2016/425 Personal Protective Equipment Category 2 and Annex II Health & Safety Requirements. **User information:** Use in low visibility condition. **Materials:** Polyester reflective fabric, with adjustable waistband, reflective film.(delete), hook and loop velcro.

Directions for use: Useful when running, biking and walking. Open the velcro and put on the vest. The vest must be worn over your clothing for full visibility. Make sure that the harness is worn tight enough to avoid getting caught in any objects. Before using this reflective vest, check that it is clean and no tears or other damage that may alter its characteristics.

Lifetime: 3 years after production date

HIGH VISIBILITY VESTS GRS

RFX+CARE takes immense pride in presenting its remarkable collection of High visibility vests, all exclusively crafted from the finest GRS (Global Recycled Standard) certified post-consumer recycled (PCR) fabric. Our commitment to safety goes hand in hand with our dedication to environmental consciousness.

By choosing PCR fabric for our High visibility vests, we not only ensure the highest safety standards but also champion a host of environmental benefits. This choice substantially curtails the consumption of raw materials, particularly diminishing the demand for petroleum-based fibers. This dual benefit not only safeguards our precious natural resources but also significantly reduces the ecological impact of material extraction.

Furthermore, our HW2 vest meets the specifications required for carrying a vest in your car, as mandated by certain European countries. This requirement ensures that you're well-prepared and compliant with safety regulations while on the road.

SAFETY VEST HW2 GRS

Description: This high visibility warning vest is classified as Class 2, featuring a fluorescent background and reflective tape, meeting the EN ISO 20471:2013+A1:2016 specification.

Product Identification: These garments proudly bear CE and UKCA markings, demonstrating their compliance with Regulation (EU) 2016/425 Personal Protective Equipment Category 2 and Annex II Health & Safety Requirements. They also adhere to Regulation (EU) 2016/425, as brought into UK law and amended.

User Information: Designed for use in traffic or low visibility conditions, the vest serves as a valuable conspicuity aid. Always wear the vest fastened at all times.

Lifetime: The vest has a lifespan of 5 years from the production date.

- HW2(V1) one size (XL) Yellow
- HW20(V1) one size (XL) Orange

Stay visible and safe with our reliable high visibility warning vests, designed for your protection in all low visibility situations.

PT2000 AND HW1 GRS

Our commitment to sustainability extends beyond just our HW2 High visibility vests. Even our PT2000 and HW1 vest, flagship products renowned for their quality and functionality, is now exclusively produced using GRS certified materials. We're strong advocates for a greener planet, and that's why our focus on PCR fabric resonates on multiple levels. This environmentally conscious approach diverts textile waste away from overflowing landfills, a critical step in tackling the pressing concern of textile waste accumulation. Every vest we produce embodies our commitment to transforming discarded materials into valuable assets, championing the principles of a circular economy. With the PT2000 vest, our dedication to sustainability and superior design comes together seamlessly. This vest, made from GRS certified material like our High visibility vests, exemplifies our unwavering commitment to innovation and environmental responsibility. As we move forward, rest assured that every RFX+CARE product carries with it not just quality and reliability, but a promise of a better, more sustainable future for all.

Description: This reflective vest, compliant with EN 17353:2020, is designed for enhanced visibility clothing in medium risk situations, featuring a fluorescent background and reflective tape. **Product Identification:** These garments proudly bear CE markings, demonstrating their compliance with Regulation (EU) 2016/425 Personal Protective Equipment Category 2 and Annex II Health & Safety Requirements. **Limitations of Use:** The vest is a valuable conspicuity aid. Always ensure the vest is fastened at all times and check for any possible damage, tears, holes, or dirt before use. **Lifetime:** The vest has a lifespan of 5 years from the production date.

360° REFLECTIVE BALL PURSE

The Meteor is a 360-degree ball that reflects a bright white light to motorists in all directions. It is lightweight, weighing only 25 g, and can reflect light from any vehicle light source up to 300 m away. You can attach it to your rucksack, saddle rails, keychain, or simply on your clothing to ensure visibility.

WARNING: The product is not classified as a personal protective equipment as per Regulation EU/2016/425.

Design patent numbers:

DM/092 368 and China ZL 2016 3 0300456.

REFLECTIVE ITEMS

Product Identification: Reflective Slap Wrap, Reflective Slap Shape, Reflective Soft Band, Soft Reflectors, and Loop Strap Soft Reflector. These accessories bear CE and UKCA markings, demonstrating compliance with Regulation (EU) 2016/425 Personal Protective Equipment Category 2 and Annex II Health & Safety Requirements, as well as Regulation (EU) 2016/426 as brought into UK law and amended.

User Information: These reflectors are designed to provide visibility to the wearer in medium risk situations under vehicle headlights or searchlights in the dark. Made of enhanced reflective material, they are suitable for use during low visibility conditions or at night to ensure the wearer's noticeability. These reflectors are essential for securing people's safety in daily life, reducing the risk of emergencies due to lack of attention.

Directions for Use: Before use, check for any possible damage such as tears, holes, or dirt.

Warning Against Improper Use: These reflectors are exclusively for visibility purposes.

Lifetime: The reflectors have a lifespan of 3 years after the production date.

Caution: The reflector must not be covered by clothing or other items. Factors such as exposure, usage, mechanical abrasion, flexing, high UV radiation, temperature variation, and humidity can degrade the visibility of reflective material. Damaged reflectors showing signs of abrasion, marks, creases, or holes should be replaced. Note that alterations, such as printing logos, may compromise the minimum areas and performance of the product.

Storage: Store the reflectors in clean, dry conditions, avoiding places with direct strong sunlight.

Maintenance: Keep the reflectors clean. They are not washable but can be cleaned with a damp cloth.

Disposal: Dispose of as normal household waste, adhering to local disposal regulations.

Transport Packaging: The sales units are packed into cartons.

EN17353:2020

EN17353:2020 Type B2 (Reflective Slap Wrap, Reflective Slap Shape, Reflective Soft Band)

Should be positioned as low as possible, as this is where the rays from a car's headlamps will first hit an object. FOR B2 DEVICES, IN ORDER TO ACHIEVE 360° VISIBILITY (VISIBILITY FROM ALL SIDES) AT LEAST TWO B2 DEVICES SHALL BE USED; THESE SHALL BE USED ON THE LEFT AND THE RIGHT SIDE OF THE TORSO.

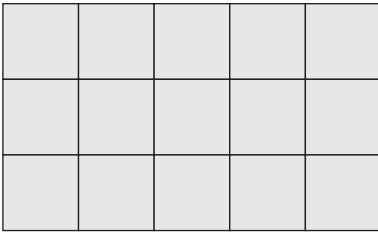

EN17353:2020 Type B1 (Soft Reflector, Loop Strap Soft Reflector)

Attach the reflector with the safety pin / ball chain / metal hook. Should be positioned as low as possible, as this is where the rays from a car's headlamps will hit an object first. FOR B1 DEVICES, IN ORDER TO ACHIEVE 360° VISIBILITY (VISIBILITY FROM ALL SIDES) AT LEAST TWO B1 DEVICES SHALL BE USED; THESE SHALL BE USED ON THE LEFT AND THE RIGHT SIDE OF THE TORSO.

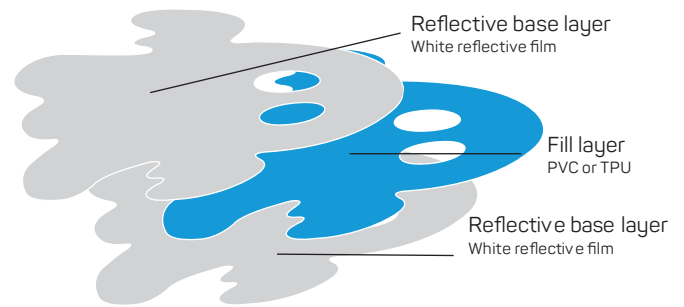

REFLECTIVE RFX MATERIAL

Important Printing Information: All our RFX soft reflective products can be printed ON or BELOW the reflective material, as well as on the back using either a digital or a screen-printing process. Printing BELOW the reflective material provides optimal reflective capacity, meeting the EN 17353:2020 standard for nonprofessional accessories. However, printing ON the reflective film can compromise the reflective efficiency. **To meet the standard requirements, there must be at least 15 cm² of free reflective area (not covered by any print) per side.**

This is 15 cm²

Inside the reflector

Phthalates free

Our products are tested and free of phthalates.

PRINTING ON the surface of the film decreases the reflective area and can compromise visibility.

PRINTING BELOW the film gives you a reflective surface with an efficiency factor of 100%.

LED REFLECTIVE SOFT BAND

Introducing RFX+Care's innovative series of reflective accessories featuring LED lights seamlessly integrated into the LED band. With a convenient switch on and off button, you have complete control over the illumination. Choose from three dynamic lighting modes: Slow blinking, fast blinking for eye-catching visibility or permanent for a steady glow. To be positioned low, precisely where the rays from a car's headlamps first hit an object. Our smart double safety reflective accessories combine retroreflective material that lights up when car beams hit it, ensuring visibility in any situation, along with integrated LED blinkers providing continuous illumination, ensuring you're seen even in the absence of headlamps. The device uses 1xCR 2032 replaceable lithium battery. LED bands are both EMC and ROHS tested.

REFLECTIVE SLAP WRAP

Slip

Slap

Wrap

The Reflective Slap Wrap is a unique elongated reflector, featuring a specially developed spring welded inside. With just a light slap, it effortlessly curls around your arm or ankle, ensuring you're seen and safe in the dark. Offering 360° visibility, the Reflective Slap Wraps are not only practical but also fun, making them ideal for carrying promotional messages.

Moreover, by using two Slap Wraps, certified to meet the EN17353:2020 standard, you can effectively make traffic safety a prominent feature of your brand. Our Slap Wraps are available in white or yellow fluorescent RFX™ soft reflective film, both colors being certified according to the EN17353:2020 Type B2. Embrace style, safety, and brand visibility with our Reflective Slap Wraps!

SOFT REFLECTOR

The Soft Reflector (hanger/pendant) must be the oldest reflective safety item. We have made them for 40 years and are constantly developing new shapes and designs. It is the perfect safety item to place on your clothing for enhancing the visibility in the darkness in all weather conditions. Children love these as they come in 1000 of fun shapes, some even collect them. Note! Soft reflector must have minimum 15 cm² to comply with CE and UKCA standard EN17353:2020 for personal safety devices. All our standard shapes are tested and certified in accordance with EN17353:2020 Type B1.

With Lithium battery (CR2032)

CHOICE OF ATTACHMENT ACCESSORY / ADD-ON

The product will be packed in a polybag with the hanger not mounted. If you prefer it to be mounted, there will be an extra cost of €0.12 per piece. Our standard hanger attachment includes a white or black string and safety pin, provided loose in a polyethylene bag. Feel free to inquire about alternative attachment options.

For all free hanging Type B1 devices the attachment must be minimum 10 cm.

This means the length between the points of attachment on the garment and that of the reflector.

MAGNET

Magnets crafted from RFX reflective soft film offer a smart and convenient solution, though they do not comply with EN17353:2020. Equipped with two super-strong magnets, this accessory allows you to effortlessly click and attach it even onto the sleeve of a thick coat. Magnets have grown increasingly popular as promotional devices for both adults and kids due to their ease of application and removal. Add a touch of practicality and style to your attire with our magnetic reflective accessories!

PACKAGING SOLUTION

GLASSINE BAGS

Over the autumn season, we will slowly replace our previous PP plastic bags with new Glassine bags. These bags are far more environmentally friendly than the old PP plastic bags. See description below.

Our new Peel and Seal Glassine Envelope Bags are all made from 60gsm glassine paper which has a glossy, smooth finish. Glassine has natural grease-proof qualities but no barrier for moisture. Glassine is made with virgin pine cellulose.

Our Glassine Envelope Bags is manufactured in the EU. It will replace your single use poly bag because glassine is biodegradable and 100% recyclable. With our planets continued fight against plastic we need look no further on how to help, with an adequate alternative in most cases when using glassine instead of plastic. Although glassine is not waterproof it is far better for the environment than plastic as it is biodegradable and recyclable.

STAND UP POUCHES SIZE SMALL & MEDIUM

KRAFT PAPER WITH LDPE

These pouches are suitable for products both wet and dry which demand high barrier property packaging. Made from a combination of materials to offer maximum protection against moisture air and light. Supplied with a grip closure which can be opened and closed hundreds of times. The self supporting round bottom gusset ensures that the pouches can stand freely on retail shelving. Ideally suited for pharmaceutical products or medical device equipment. A great alternative for hardcase plastic packaging.

COMPOSTABLE POUCH - PLASTIC FREE

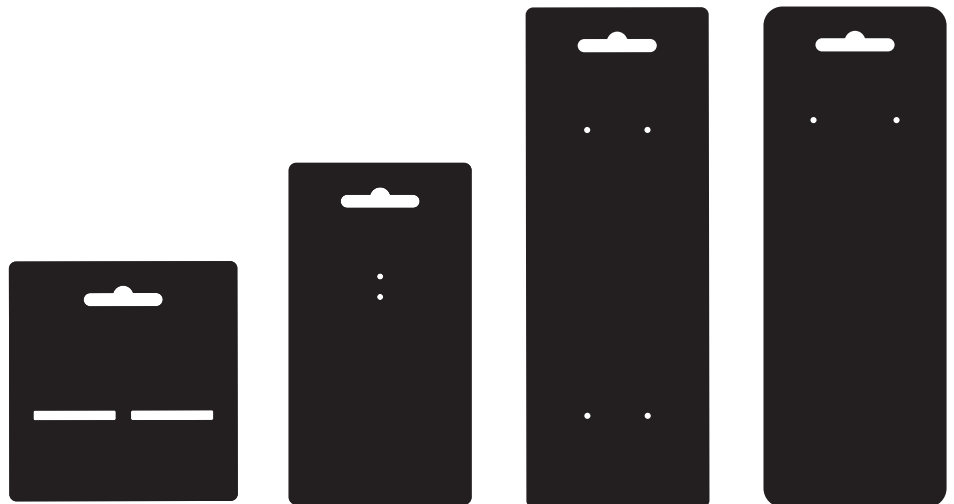

Constructed entirely of FSC sourced kraft paper and PLA - a compostable monomer produced from fermented non GMO corn starch. PLA is biodegradable under industrial composting conditions starting with an hydrolysis process and following with the action of microorganisms to ultimately degrade the PLA. Compostable, bio based & recyclable. Our compostable pouches are not suitable for liquids. A greener alternative, with stand up functionality and with half or full full colour printing.

SIZE: 120 x 210 mm + 95 x 150 mm

HANG CARDS - INDIVIDUAL SIZES

Hang cards made to match product in size.

BOXES / POLYBAGS - INDIVIDUAL SIZES

Boxes or poly bags made to match product in size.
